Seminar: Open seminar on negative emissions: Bridging societal and mitigation needs

02. Sept 2015, Tsukuba/Japan

"The main objectives of this half-day seminar of MaGNET(Management of NegativeEmission Technologies) are capacity building (e.g. at universities, research facilities) and outreach to possible stakeholders both in terms of policymakers and in terms of those parts of industry that would implement NETs, especially BECCS (Bioenergy & CCS)."
