Lecture: Wealth, Global Warming and Geoengineering

12.10.2015, Phoenix/USA

"So far the environmental movements considered the risks associated with these options greater than the risks of the effects of warming resulting of people's quest for wealth and large families. As an example, the environmental movements successfully applied to the iron fertilization of Southern Oceans rules of the London Convention on the Prevention of Marine Pollution by Dumping of Wastes and Other Matter."

Lecture: Into the Great Wide Open? The Promise and Peril of Climate Geoengineering (Wil Burns)

12. October 2015, Dayton/USA

"This presentation will seek to unpack the prospects and risks of climate geoengineering, as well as examine how research, and potential deployment, might be regulated at the international level."
