Panel discussion: Im-Possible Climate: Safe Climate Restoration under the Microscope

4. November 2015, Melbourne/Australia

"Advocacy for the restoration of a safe climate calls for solutions that the world does not currently possess. The central question remains 'is safe climate restoration possible and, if not, what level of action is now morally defensible and yet practically achievable?' Join Breakthrough for this special forum to examine and critique the recently published discussion paper [StrikingTargets](#), with author Philip Sutton. "
