## **Presentation: Going Rogue: Russ George and the Problem of Governance in Geoengineering**

**10. July 2016, Vienna/Austria**

Oral Presentation at the ISA Forum of Sociology. "In this paper I review the evidence on how the world has dealt – or, more exactly, failed to deal -- with Russ George. I then ask: What can we learn from the failure to control him about the problem of governance if the world's nations at some point start think that geoengineering is the only option left to them? "
