Event: A Machine For Making The Future

12. September 2016, Scripps Institution of Oceanography, La Jolla / USA

"A Machine For Making The Future brings together experimentalists to work in interdisciplinary groups on proposals for experiments on the material and the imaginary of the air, atmosphere and the climate. The event is a mirror of a workshop on [Low Environmental Impact Climate Engineering Experiments](#) held at the Institute for Advanced Sustainability Studies in Potsdam on September 7-8, 2016."
