Lecture: Climate Repair

14. February 2019, Cambridge / UK

"Time is no longer on our side. What we continue to do, what we do that is new, and what we plan to do over the next 10 to 12 years will determine the future of humanity for the next 10,000.' Join us in a talk by Professor Sir David King on climate repair and his new initiative - the Cambridge Centre for Climate Repair. "
