Webinar: Pyrogenic Carbon Capture & Storage: a key climate technology (IBI)

20. February 2019 / online

"The IPCC's recent Special Report listed biochar and pyrogenic carbon capture & storage (PyCCS) as one of only six negative emissions technologies (NET) that may be capable of rebalancing carbon. This webinar will discuss the implications for the biochar industry and what work still needs to be done to optimize the carbon drawdown impact of pyrolyzing organic materials."
