Presentation & Conversation: Inventing the Future: Zero Carbon Fuels and Climate Restoration

22 November 2019, New York / USA

Livestream available

"Join the Center on Global Policy and Columbia University's Earth Institute for a discussion with **David Keith, PhD**, Gordon McKay Professor of Applied Physics, School of Engineering and Applied Sciences (SEAS) and Professor of Public Policy, Kennedy School of Government, Harvard University. The presentation will focus on carbon neutral synthetic fuels. Following his presentation, Dr. Keith will join **Julio Friedmann, PhD**, Senior Research Scholar for a moderated conversation including solar geoengineering, CO2 removal, and approaches to rapid and profound decarbonization."
