Event: Hope vs Hopium with Karen Mahon Carrington (by UBC School of Public Policy and Global Affairs)

29. January 2020, Vancouver / Canada

"We are living through the early stages of climate change and while we strive to do everything we can to mitigate further impacts, we now know that adaptation will be a necessity. [...] In this session we will look at tools and maps to help guide us through this time of massive upheaval. We will look at the hard lessons learned by humanity at other difficult times and from them, explore how we can live full, engaged, meaningful and even joyful lives through this time of climate chaos."
