Webinar: The Net Zero Teesside project: Advancing carbon capture, utilization and storage (CCUS)

26. May 2020, online

"Presented by Colin McGill of BP, the webinar will cover the genesis and state of play of the Net Zero Teesside project that aims to facilitate the first decarbonised industrial cluster in the UK, capturing up to six million tonnes of carbon dioxide (CO₂) emissions annually by 2030 from local, carbon-intensive businesses."
