Event: C2G Campfire Chat: Governing Solar Radiation Modification Research: Insights from Marine Cloud Brightening and the Great Barrier Reef

16. July 2020, online

"In this C2G Campfire Chat, we will explore:

- How to situate MCB in the global challenges of response to climate risks context?
- What is the latest research and debate about MCB as well as the governance implications of potential deployment?
- What could we learn from the recent MCB outdoor experiment in Australia to move forward the governance of Solar Radiation Modification research?"
