Event: Scrubbing the Skies: Carbon Dioxide Removal Approaches and Their Potential Role in Addressing Climate Change

05. March 2021, online

"This presentation will discuss the potential benefits and risks presented by an array of carbon dioxide removal geoengineering approaches. It will also include a discussion of governance efforts to date by international treaty regimes, and other potentially pertinent regimes such as the UNFCCC/Paris Agreement and the United Nations Convention on Law of the Sea, as well as the role of domestic law."
