## **HCI Webinar: Carbon Capture, Regenerative Agriculture and Solar Radiation Management - A strategic overview**

**06. March 2021, online**

"Andrew C. Bailey and William F. Tooley explore the challenges and opportunities presented by the climate crisis: strategies for success and the difficulties in getting philanthropists to understand what is needed, in getting governments to act, the obstacles to obtaining research and development funding, and the opportunities that await the educated investor. An overview of the climate restoration field reveals a multi-trillion dollar industry in its infancy. Solar and wind are just the beginning."
