Meeting: Carbon Dioxide Utilisation: Faraday Discussion

07. - 09. April 2021, online

"This meeting is for established scientists, post-graduate students and industrial researchers interested in carbon dioxide utilisation. Given the rapid expansion of global research into carbon dioxide utilisation, the unique format of the Faraday Discussions will allow for in-depth discussions and opportunities to establish new collaborations."

Webinar: Co-delivery of food and climate regulation by temperate agroforestry (CALIBRE)

07. April 2021, online

"'Tree technology' needed for agroforestry is already available to use on a mass scale, unlike other negative emission technologies (NET) that require further research and development. Given the urgent need for NET to be implemented before 2020 to avoid 2oC warming (Rogelij et al. 2013), agroforestry is very well-placed to play an immediate transitional role in the transformative innovation needed to move towards a low-carbon future with multifunctional land use beyond food production in isolation."
