Event: Foundation for Climate Restoration: Third Annual Climate Restoration Forum

30. September - 01. Oktober 2021, online

"Building on the momentum of the growing climate restoration community, the Forum will inspire further movement through illustrating the incredible progress already being made. In the past year, we've seen such advances as incentives for low-carbon building materials through procurement legislation around the world, growth of voluntary durable carbon removal markets to increase investment in climate restoration solutions [and] calls from communities of Faith to raise climate ambition and restore our common home. The Forum will highlight these and other movements toward climate restoration among the carbon removal industry, the private sector, the grassroots efforts, and more. It will host multi-stakeholder discussions related to the challenges and opportunities to restore the climate."
