### **Conference Session: The Potential for Carbon- and Climate-Engineering to Offset Global Change**

**22.06.-02.07.2015, Prague/Czeck Republic**

Session on the 26<sup>th</sup> General Assembly of the International Union of Geodesy and Geophysics (IUGG). "Papers are invited that describe and address the potential effectiveness and scientific and technical problems associated with geoengineering. Possible examples include the potential for enhancement of carbon sinks, modeling studies of the climatic impacts of proposed schemes for altering the absorption of solar radiation; studies of unintended environmental consequences; and evaluations of technological feasibility issues."

## **Webinar: Geoengineering: What is it and what technologies are being explored?**

**04.03.2015**

"This webinar panel presentation will cover the basics of climate intervention, or geoengineering, including two types of technologies that are being proposed. Dr. Phillip Rasch from the Pacific Northwest National Library will present the basis of marine-cloud brightening and Dr. Simone Tilmes from the National Center for Atmospheric Research will present stratospheric aerosol loading."

## **Webinar: “Into the Great Wide Open? The Promise and Potential Perils of Climate Geoengineering”**

**20.03.2015, Webinar**

"The purpose of this presentation will be to assess the potential benefits of climate geoengineering, as well as potential negative impacts. Moreover, governance issues will be addressed, including pertinent international treaty regimes and the potential implications of overlapping jurisdiction, the contours of a potential framework for liability for potential negative impacts, and how to address potential moral hazard concerns associated with proceeding with a geoengineering research program or deployment of geoengineering technologies."

## **SRM Science Conference 2015**

**12.-14.03.2014, Cambridge/UK**

"Solar Radiation Management Science 2015 will be held from 12th to 14th March 2015, at the University of Cambridge, Cambridge, UK. [...] To coincide with the conclusion of the Stratospheric Particle Injection for Climate Engineering (SPICE) Project, this conference will present and discuss state-of-the-art scientific knowledge relating to SRM with reference to a responsible innovation approach that considers wider ethical, social and governance issues."

## Seminar: Geoengineering as a Collective Experiment

**14.04.2015, Boulder/USA**

"Looking into the experimental systems of geoengineering, we can see the negotiation of what is known and unknown. In renegotiating such systems, we can approach a new mode of governance – collective experimentation."

## Panel discussion: Climate Engineering and Human Rights

**05.05.2015, Chicago/USA**

"A discussion hosted by [The International Human Rights Law Clinic](#) at the University of Chicago Law School"

## **Lecture: The Ethics of Climate Engineering**

**26.03.2015, Monterey/USA**

"A talk by FCEA Co-Director, Wil Burns, as part of the SEGP Conference "Ethical Governance in the 21st Century" at Monterey Institute of International Studies, Monterey, California."

## **Workshop: Assessing Global Climate Engineering Governance (invitation only)**

**31.03.-02.04.2015, Zurich/Switzerland**

"The workshop will bring together global climate engineering governance experts to discuss how to achieve the cooperation required for taking good decisions on climate engineering on a global scale-up to 2050."
