Utility Week: Will Gardiner: The next nine months are critical

"Drax chief executive Will Gardiner shares his thoughts on the countdown to COP, calling it a unique opportunity to showcase the UK's decarbonisation expertise. However, he warns that to present a coherent argument on how we will tackle emissions, the government needs to be clear on frameworks for supporting the rapid scale-up of a diverse range of technologies."

Bioenergy Insight: 2021 Outlook – “BECCS is critical to achieve net zero”

"Events of 2020 — the COVID-19 pandemic that has killed over two million people and severely impacted the global economy, and extreme weather and natural disasters around the world — have heightened awareness about human impacts on the natural environment. This has galvanised action to tackle the climate crisis and shone a spotlight on solutions that will be crucial in meeting climate targets such as sustainable biomass for power, negative emissions, and bioenergy with carbon capture and storage (BECCS)."
