Science Business: NTNU: Geoengineering, other technologies won't solve climate woes

"The countries of the world still need to cut their carbon dioxide emissions to reach the Paris Agreement's climate targets. Relying on tree planting and alternative technological solutions such as geoengineering will not make enough of a difference."

Give Well Blog: Potential global catastrophic risk focus areas

Article on global catastrophic risks with a paragraph on CE. "Our conversations have led us to believe that there is significant scientific interest in conducting geoengineering research and that funding is an obstacle, but, as with biosecurity, we do not have a very detailed sense of what we might fund."
