## **International Summer School “bio:char crossroads”**

### **Summer School 09. - 16.09.2012**

"The multi-talented biochar is one of the world's fastest growing research topics. The 1st International Biochar Summer School “bio:char crossroads” offers excellent young scientists from around the world a valuable means of information exchange and professional development. It will be a highly productive event with good opportunities for networking with senior scientists and peers in the field of biochar. The main topics of the Summer School are: biochar production, feedstock availability, system integration, biochar characterization, and soil effects of biochar."

## **La Via Campesina: Reclaiming our future: Rio +20 and Beyond**

La Via Campesina, the international peasants' organization struggling against global capitalism, has called for governments to impose a complete ban on all geoengineering activities at the upcoming Rio+20 conference. La Via Campesina is a charter member of the HOME anti-CE campaign, along with the ETC Group, Biofuelwatch, and other groups.
