Exhibition form the project “Images of Disaster”

"The exhibition “Von Atlantis bis heute – Mensch. Natur. Katastrophe” will display the findings of the research project “Images of Disaster”. The show illustrates how human beings respond to the violence unleashed by extreme natural events. It investigates culturally formed patterns of action and collective strategies of coping, as individuals, societies and world-views are exposed to the most elemental of borderline situations."

German exhibition in Reiss-Engelhorn-Museums Mannheim/Germany, September 7, 2014 – March 1, 2015.
