## **FCEA Blog: Discussion of Climate Engineering in Social Science Literature: Technofix, Plan B or Ultima Ratio**

"This post is the distillation of one section of a more comprehensive review by the author of social science literature on climate engineering technologies. [...] The aim of this paper is to discover which representations of climate engineering (CE) are considered most salient, and how they are approached. The author argues that the understanding of climate engineering as (part of) a solution to the political problem of climate change is the dominant frame in the discourse on the issue."
