## **Job at Carnegie: Postdoctoral Opportunity: Geophysical modeling of ocean engineering proposals**

### **No deadline**

"We are looking to hire a postdoctoral research scientist who would undertake geophysical modeling to address some of the issues raised by these proposals. We have done some initial highly-idealized modeling at unrealistic scale (e.g., Kwiatkowski, Ricke and Caldeira, 2015), and would like to understand whether those results apply to deployments at more plausible scale. The model used could be anything from a high-resolution local model to a coarse-resolution global model, depending on the problem being addressed."
