## **Nautilus: An Astrobiologist Asks a Sci-fi Novelist How to Survive the Anthropocene**

On the antropocene and not directly on CE. "Humans will have a chance to prove their adaptability as the Earth undergoes unprecedented challenges in the Anthropocene, an era named after our impact on the biosphere. To learn what it takes to survive far into the future, astrobiologist David Grinspoon interviewed Kim Stanley Robinson, a writer regarded as one of the most important science fiction and political novelists alive today."
